

KINGDOM OF ANTS

A GAMIFIED DEFI ADVENTURE
FOR SUSTAINABLE GROWTH AND AI-ENHANCED USER EMPOWERMENT

THE PROBLEM

In the world of DeFi, many projects have promised high yields and revolutionary platforms. We've seen these projects fail due to short-term strategies, unsustainable practices, and a lack of long-term sustainability.

At present, retail investors also fear that DeFi is too complicated to understand and use.

Lack of customer support

Accessibility - high minimum requirements

Difficult for an average person to use

User error risk which comes from overly complicated DeFi platforms

THE SOLUTION

The Kingdom of Ants is a sustainable highly interactive gamified platform powered by AI, that easily translates complex DeFi products into a fun, smooth, user-friendly experience.

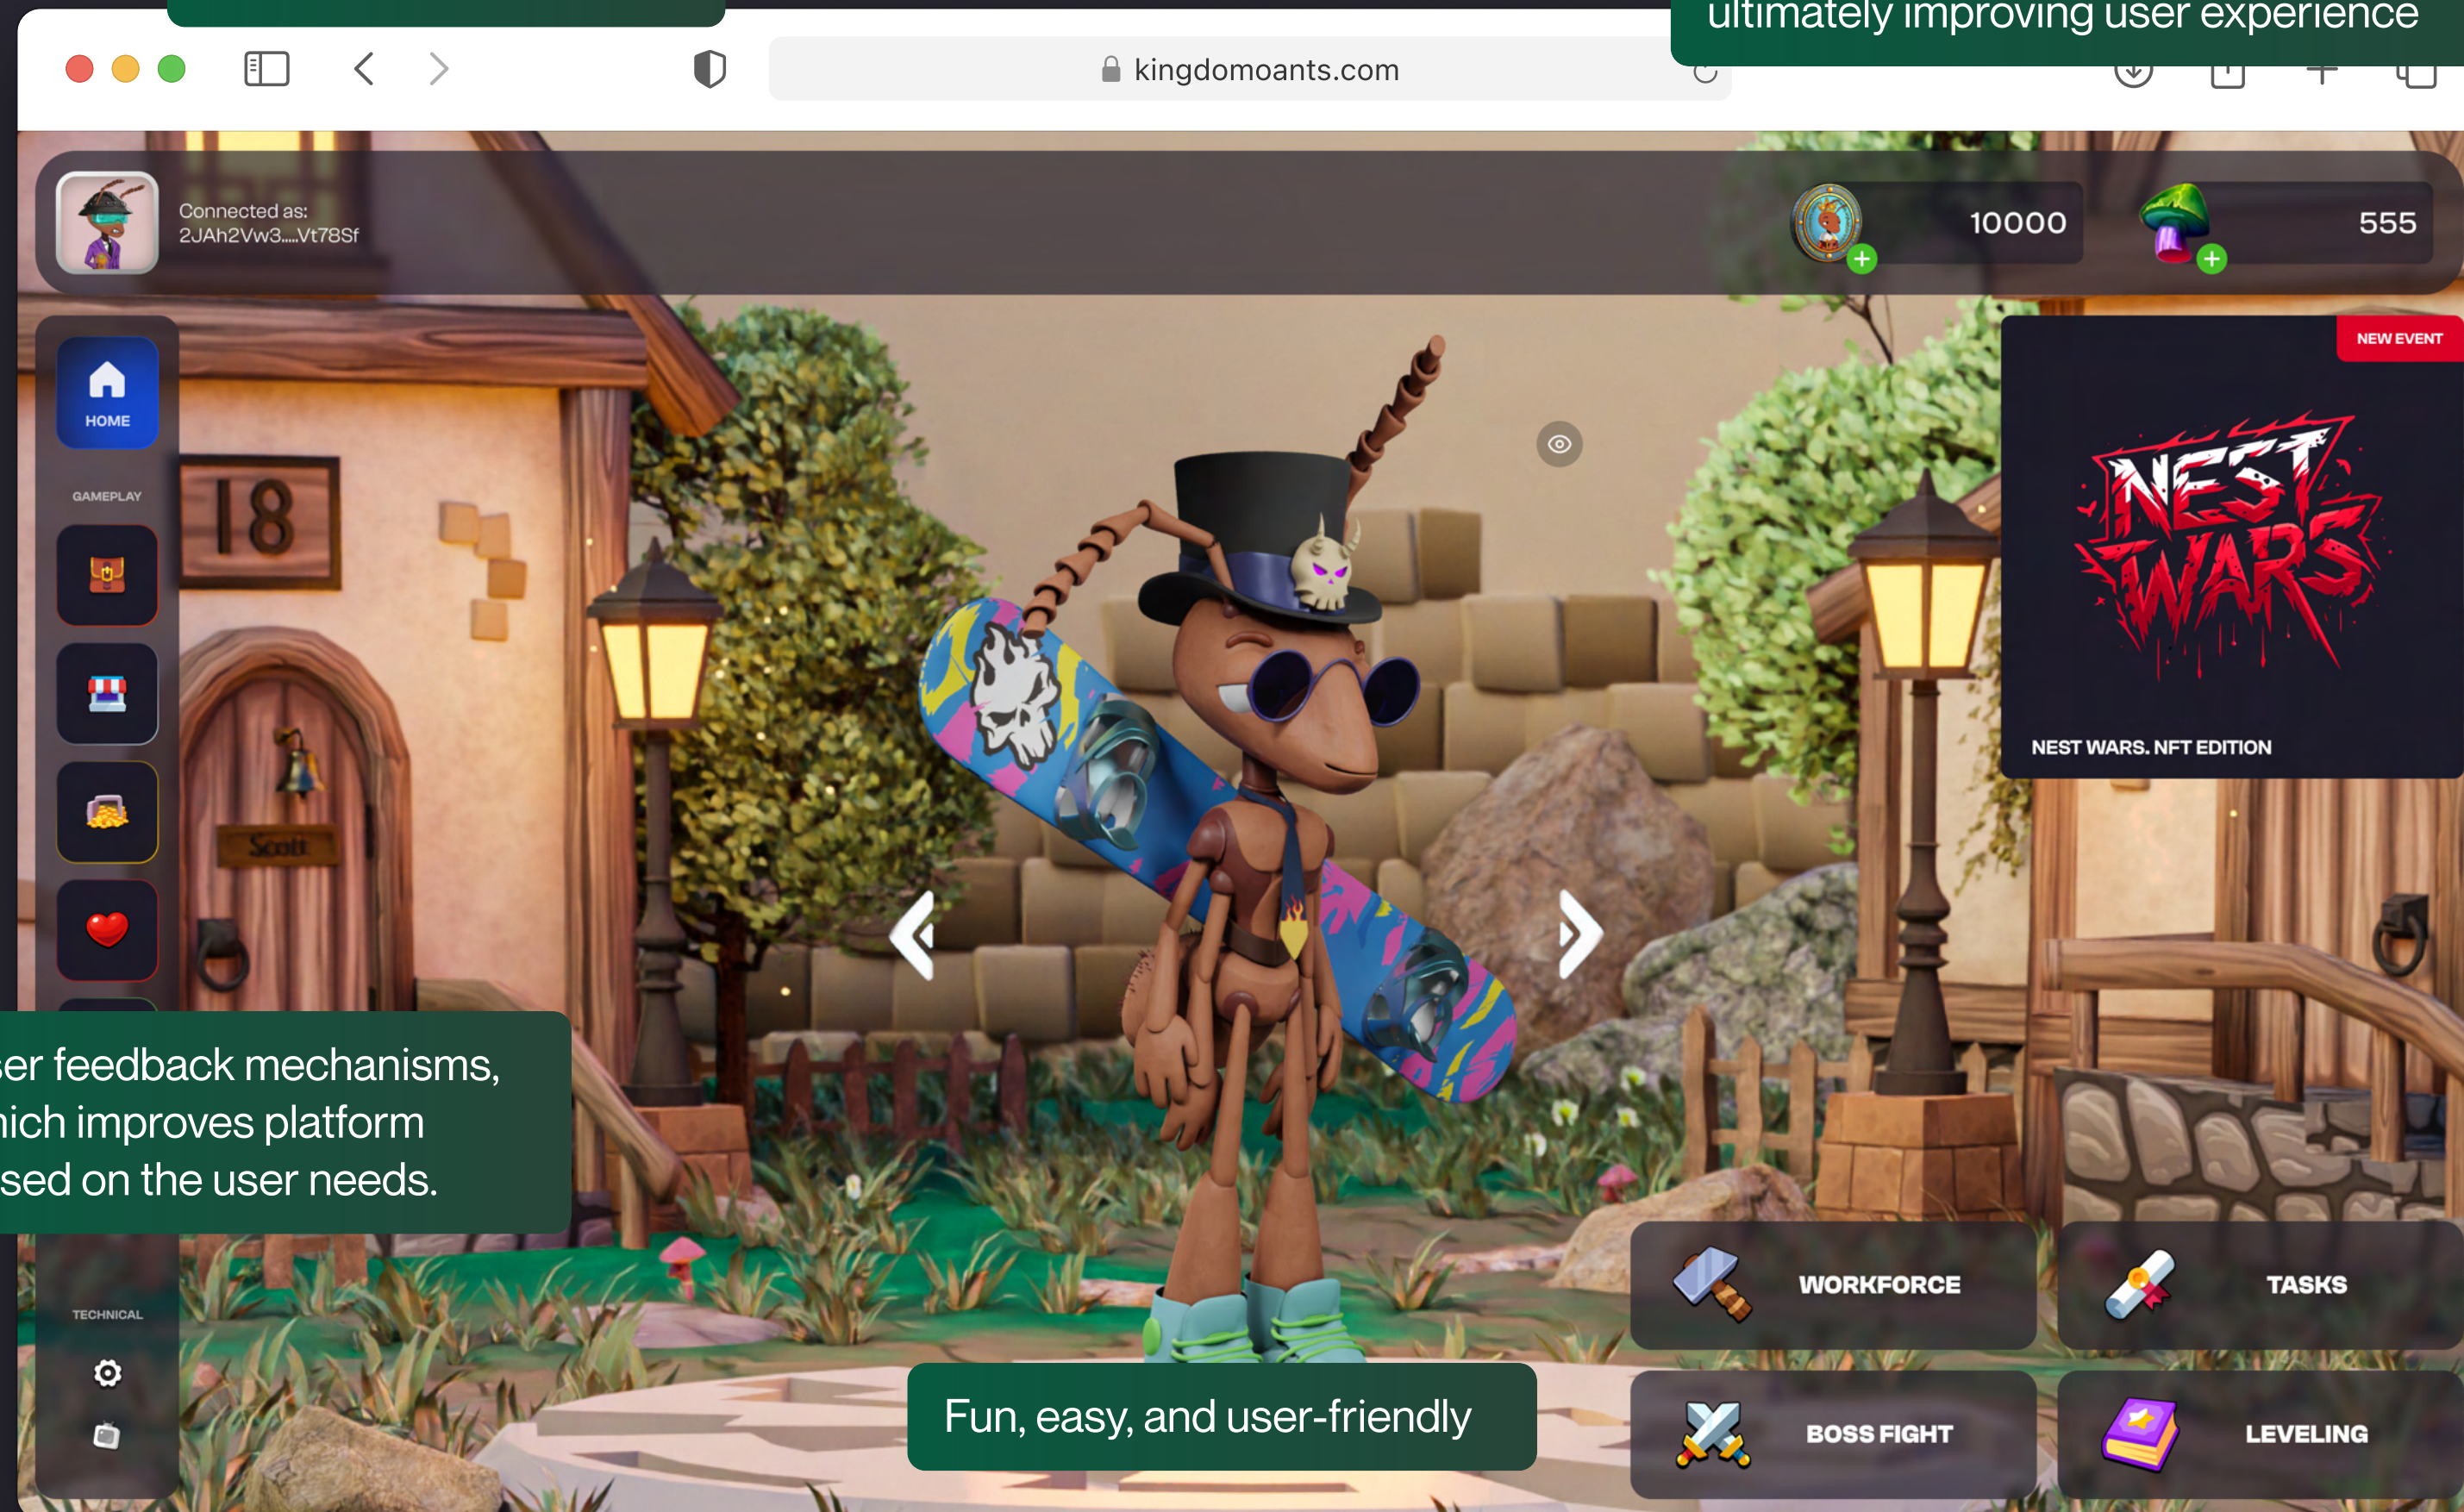

Our unique sustainable treasury model leverages gamification, and AI-driven strategies as integral components of a DeFi platform that's built to last.

Increased transparency

An AI expert guide that provides knowledge base within the Ant Kingdom and Defi, ultimately improving user experience

User feedback mechanisms, which improves platform based on the user needs.

Fun, easy, and user-friendly

ACTIVITIES IN THE KINGDOM

04

TASKS

In Kingdom there are a lot of daily things to do to ensure that Kingdom functions with its full potential.

BOSSSES

Occasionally ANTS will challenge hostile bugs near the Kingdom. In boss fight there are casualties, but rewards are worth it!

GATHERING

ANTS can join the hunting group and go out to search for food. A BIG Kingdom needs a lot of food to be able to feed all the ANTS.

LEVELING

Assign your ANT in the leveling grounds and observe as it levels up over time!

INCUBATING

Provide ANT Food for the kingdom, in exchange you are rewarded with a Premium ANT NFT!

LOTTERY

The Kingdom of ANTS lottery is drawn weekly to transform the life of one lucky ANT for the better!

CHEST

From chests users can get ant food, lottery tickets or leveling potions

KINGDOM'S TREASURY

IN-GAME PURCHASES

In-game purchases generate \$SOL. Part of the \$SOL will be reinvested to generate profits. The other part is used to provide liquidity.

- The bigger the treasury. The longer the runway,
- The bigger the treasury. The higher the backing per \$ANTC
- Stablecoins (USDC) have a fixed weight of 50% in the invested assets category
- Other assets and their weights are determined by community (DAO)
- AI Integration in Treasury Management
